ABOUT ME

Proactive MERN Stack Developer with handsome amount of experience architecting and delivering scalable, responsive web applications using MongoDB, Express.js, React, and Node.js. Skilled in full-cycle development, from RESTful API design and database schema modeling to modern front-end engineering with React Hooks, Redux, and component-driven UI.

PROJECTS

Techify Repairs   *Click Titles to see Live Demo*

A MERN-stack ticketing solution that lets staff create, update, and archive repair notes with user authentication via a Node/Express REST API and MongoDB storage. The React front end offers dynamic forms and filters for logging diagnostics. For Demo use these Credentials: (Username: AhmedAbbas, Password: A1122)

YouTube Clone

Developed a responsive YouTube clone using React and Material-UI and integrated RapidAPI's free YouTube Data API to fetch content. Implemented search, channel pages, a custom video player with related videos, and a tabbed feed for popular categories to improve content discovery.

JobHunt - Job Portal Application   *Under Development*

A full-stack MERN application featuring separate student and recruiter dashboards with secure JWT-based authentication, role-based access, and RESTful APIs for job posting, application tracking, and profile management. Integrated MongoDB for data persistence and Nodemailer for real-time email updates on application status. Currently under active development and pending deployment.

Instagram Clone   *Under Development*

A MERN-stack social media app featuring JWT-based authentication, user profiles, post creation/editing, dynamic feeds with likes and comments, and follow/unfollow functionality. Currently under active development and not yet deployed.
